

For the diary: JD7760 Feedback Sessions

The National Centre for Engineering in Agriculture (NCEA) is seeking feedback from growers about the incorporation of the John Deere 7760 On Board Module Builder (JD7760) into farming systems. Discussion forums will be held in Hillston, Emerald, Toowoomba, Dalby, Goondiwindi, Warren and Narrabri.

These feedback sessions are supported by CRDC, NCEA and University of Southern Queensland. The discussion topics will centre on the factors involved in the decision to adopt the JD7760, how it was incorporated into farming systems and way it has impacted individual farms. Additionally, this feedback will be made available to John Deere – so take the opportunity to have your say!

Whether you are a contractor or a grower currently using, or thinking of using, a JD7760, the organising bodies want to hear from you.

Discussion Forum Dates

- Hillston Ex-Servicemen's Club, High Street, Hillston – Friday 31 May 2013 (RSVP: Thursday 23 May)
- Emerald Explorer's Inn, Springsure Road (Gregory Hwy), Emerald – Thursday 13 June 2013 (RSVP: Wednesday 5 June)
