

bringing Australia into line with the rest of the world in terms of quality and relevance of cotton fibre research.

Objective 5: Maintain effectiveness of the R & D effort.

Project Code: CRC4C (Objective 5)
Project Title: Portable weigh cells for cotton trials.
R & D Organisation: Cotton R & D Corporation
Location: Narrabri
Principal Researcher: Mr R Schulzé
Period of Project: January 92 to June 92

Project Objective: A new project with the objectives of:

- to supply equipment to accurately weigh cotton from field trips.
- to assist regional adaptive research including implementation of the CRDC Variety Trials Protocol.

Report: Five sets of weigh cells and ancilliary equipment were purchased.

These augment facilities already in place in some regions. The new scales are located at Dalby; Moree (two sets to cover irrigated and raingrown trials); Narrabri (to assist upper Namoi trials); Warren.
